

TSUSB

Helper programs and documentation for
TurtleStitch workshops

Can be found at [GitHub.com](https://github.com) (search for TSUSB)

Hans de Jong
14 June 2026

Five programs (for Windows only)

TSSstart

A program that will start the default browser with the TurtleStitch page opened. Gives a TurtleStitch icon on the desktop

TSUSB-Label **

This program can be used to sequentially label a series of (generally blank) USB sticks.

* = ready soon

** = planned for end Q3/2026

TSUSB-Export *

Export the design to a TurtleStitch USB stick

Export .XML and .DST from Downloads folder on insertion of USB stick with a volume label starting with *TURTLEST*. But only after checking the design.

Update files on the desktop, the documents folder or the downloads folder

On insertion of a USB stick with volume label UPDATETS files to be updated are copied from the stick to the respective locations.

TSUSB-Clean *

Move TurtleStitch related content to PC on insertion of a TurtleStitch USB stick. Possibility to annotate / flag certain designs

TSUSB-Import **

This program is designed to copy a .DST file on a USB stick to one or more USB connected embroidery machines.

And further documentation* about ...

- Considerations for on-line or off-line
- How I run my workshops
- How to run a local host
- How to start background tasks at Windows bootup
- How I clone my laptops

* = ready soon
